

New catalogues for 2011

The latest catalogue from Engrenages **HPC** was published in March 2011.

Over 150 new products have been added, these include lifting pins, gearboxes and motor-gearboxes, V belts, clamping slides and a completely new range of precision gears.

For 2011 the catalogue comprises the 5 "classic" volumes plus a new one dedicated to the new precision gear range:

- 1 Mechanical components
- 2 Power transmission
- 3 Guiding elements
- 4 Gears and sprockets
- 5 Housing components
- 6 Precision gears

New for 2011

This new volume covers a new range of precision spur gears that because of their special surface finish and controlled backlash offer smoother movement and reduced vibration. The advantages in terms of increased efficiency, noise reduction and reliability are obvious.
