

# CAD files

**HPC** first opened its 3D CAD download portal in November 2007.

Since then it has continually been updated with the new products from new catalogues as they are published.

Access is available online via the [www.hpceurope.com](http://www.hpceurope.com) website. Once connected, you can consult all 6 volumes of the **HPC** catalogue.

CAD files can be downloaded directly or requested to be sent by email in the following formats:

- 2D: DWF, DWG, DXF and IGES
- 3D: DWF, DWG, IGES, Parasolid, SAT, STEP and STL
